Designed and manufactured in the U.S.A.

6RNWC-IIA

6 ROLL NARROW WEB
CLEANER SYSTEM 12"
WITH 12" ADHESIVE
TAPE

6 Roll Narrow Web Cleaner System 12" with 12" Adhesive Tape

Polymag Tek's 6 Roll Narrow Web Cleaner System (6RNWC-IIA) is designed to remove loose particulate contamination from a moving substrate. The Polymag® Blue Contact Cleaning Rolls (CCR) contact both sides of the web as it transports through the web cleaner. Surface contamination is transferred from the web to the CCR's. The 1.25" O.D. CCR's are then continuously cleaned with Two Tape Rolls.

The top CCR's and adhesive tape roll assemblies create a nip between the web and the lower fixed CCR's. The web drives the 4 CCR's and the 2 tape rollers.

The contamination from the web collect on the surface of the Adhesive Tape Rolls. When the Tape rolls become saturated, a layer of tape can be removed. Each tape roll contains 66 feet of adhesive tape. Approximately one foot of tape is used per tape change.

***All Our Web & Sheet Cleaners can be custom designed to fit any application.**

This unit can be manufactured up to 30" wide.
